EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 1

Line 7, after parameter, please delete " such as" and insert --including--.

Line 13, after processor, insert --wherein the trend analysis is a regular least square regression or a weighted least square regression performed over a predetermined period of time, and wherein said weighted least square regression results are inversely proportional to the variance of point estimates of the population parameter obtained in said generating of point estimates of at least one population parameter steps and generating confidence bounds for said estimates step--.

Claims 6, and 8 are canceled.

Authorization for this examiner's amendment was given in a telephone interview Michael Witham (Reg. No. 32,635) on May 23, 2005.

Allowable Subject Matter

2. Claims 1, 4-5, and 7 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record to is to Cohen et al (U.S. Patent No. 5,740,035) and to Zhu (Making Bootstrap Statistical Inferences). Cohen et al teach a method providing a centralized survey data processing means for processing survey data entered remotely

Art Unit: 3623

by a plurality of survey respondents and providing a plurality of self-administered survey means for accepting survey data from respective survey respondents. Zhu teaches a method for sampling population parameters using statistics. However, the combination of Cohen et al and Zhu fails to teach predicting future survey responses of the population based on said trend analysis by calculating a forecast of future values of said population, and wherein a trend analysis is a regular least square regression or a weighted least square regression performed over a predetermined period of time taken in combination with a computer implemented method for analyzing survey data as recited in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Peter (U.S. Patent No. 5,893,098) discloses a method for obtaining and collating survey information from a plurality of computer users,

b. Renaud (Wo9959096) discloses a method for generating customer surveys and customer survey reports.

c. Alavi (U.S. Patent No. 5,970,467) discloses a method for rapidly electronically collecting survey data from different locations from interested responders.

Art Unit: 3623

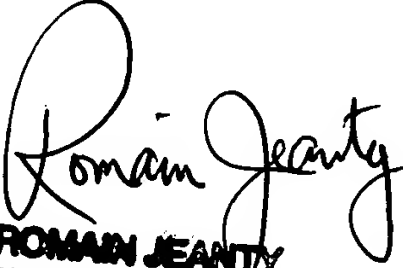

d. Duboff "Researching The Future Internet" discloses the concept of predicting target population.
